

LOUD AND CLEAR
TWO WAY RADIO COMMUNICATIONS
THAT HELP INDUSTRY FLOW

INNOVATORS OF **LOUD AND CLEAR** RADIO COMMUNICATION SOLUTIONS

FROM COMMERCIAL FLEETS AND SURVEILLANCE TEAMS, EMERGENCY SERVICES, PORTS AND AIRPORTS – WE MAKE SURE YOUR TEAM CAN BE HEARD LOUD AND CLEAR EVERY TIME, WITH RELIABLE DIGITAL TWO WAY RADIO COMMUNICATIONS.

Specialists in digital and analogue voice technologies, two-way radio networks and data application integration, our unrivalled technical ability enables us to connect any operating environment, no matter how complex or remote.

LEADING INNOVATION IN THE GLOBAL TWO WAY RADIO INDUSTRY

Our longevity is testimony to our success; we've been designing, building and commissioning custom communication systems in Sydney for more than 45 years, and are proud to lead innovation in the Australian two way radio industry.

Partnering with only the best global two way radio and technology brands, we are committed to delivering the right solution on time and within budget.

We frequently build custom infrastructure to support unique client needs. Our two way radio technology partners include Motorola, TAIT, 4RF, RF Industries, Omnitronics and Icom.

We are also an authorised supplier under NSW Government Period Supply Contract ITS 2573 for the supply of radios and associated equipment and services.

NETWORKS THAT MOBILISE PRODUCTIVITY, VISIBILITY & EFFICIENCY

As experts in wide area digital two way radio systems, we offer both private and public two way radio networks and products across greater New South Wales and Australia.

The Orion Network

If your operations demand a two way radio network that can support Australia-wide communications, The Orion Network offers you reliable, integrated voice and data coverage, with seamless roaming across Perth, Sydney, Newcastle, Wollongong, Brisbane, Adelaide, Melbourne and Canberra. Mastercom is proud to be a founding partner of The Orion Network in Australia and is a stockist of OrionReady radios and accessories.

Private Networks

We frequently develop private communication systems and internal infrastructure to cater for enhanced security and unique operating requirements. Our technical engineers and installation team are skilled in delivering custom built, point to point and SCADA networks.

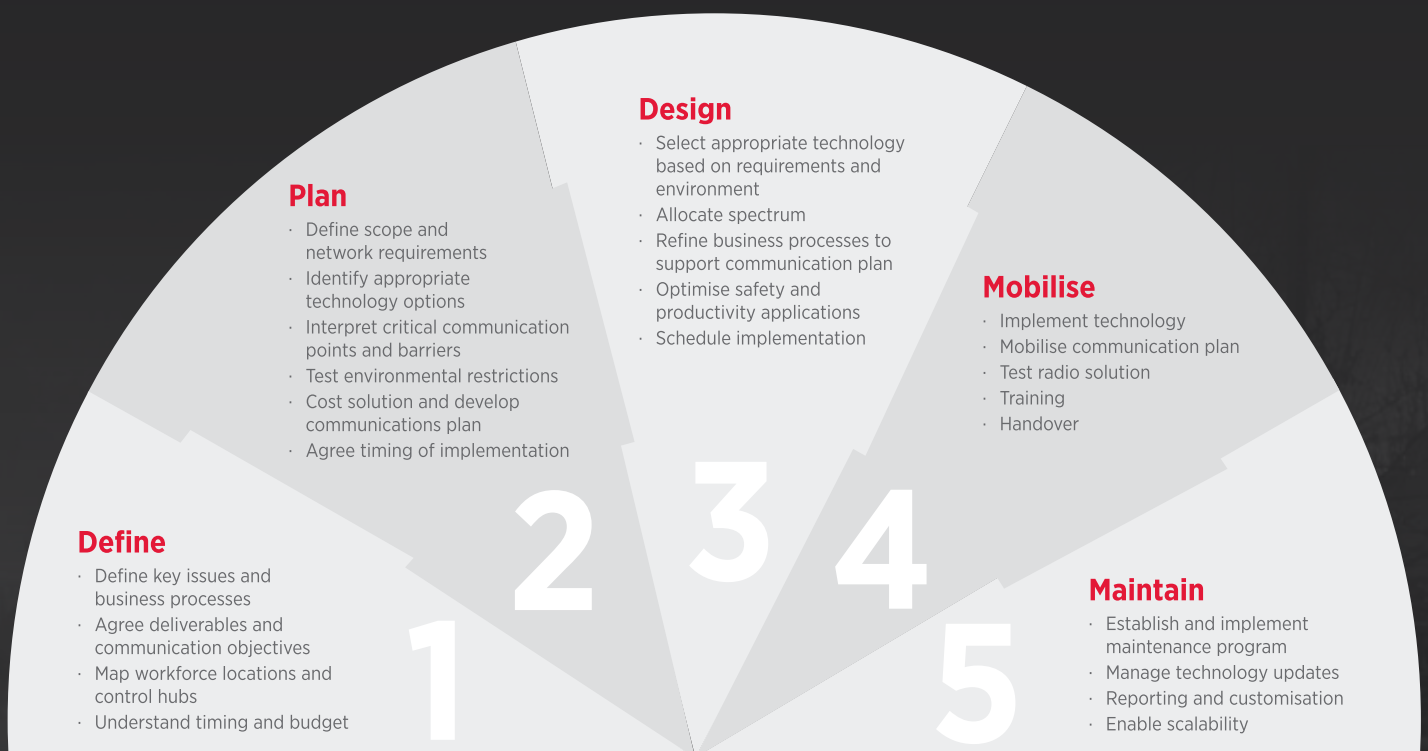

HOW WE WORK WITH YOU

AT MASTERCOM THE QUALITY OF OUR WORK IS FOUNDED ON OUR TECHNICAL EXPERTISE, TRUST, RESILIENCE AND RELIABILITY.

We understand that no one solution or technology can be applied to every workplace environment, so we work with you to understand your operations and key deliverables in designing a bespoke radio communication system. Our five-phase approach enables us to provide a scalable solution that suits your collaborative needs of today and future mobilisation growth.

OUR FIVE PHASE VALUE CHAIN ANALYSIS

WE ALIGN OUR SERVICE MODEL TO YOUR COMMERCIAL REQUIREMENTS AND COMMUNICATION GOALS.

OUR SERVICE DOESN'T STOP AT HANDOVER

Managed Services

By contracting the management of your radio communication system to Mastercom, you can scale the level of support required to suit your unique workplace environment and budget.

Field Maintenance

Achieve greater efficiencies from your two way radio system and ensure its reliability, let our two way radio field maintenance team deploy, optimise, and repair your two way radio communication system.

Fleet Installation

Fixed cost communications are a reality with digital two way radio communications. Our fleet focused solutions offer huge efficiencies and safety enhancements including location tracking, fleet routing and duress features.

Program Maintenance

Scheduled maintenance and periodic testing of network infrastructure and equipment can not only improve the life of your two way radio system, but can also provide you with greater certainty of up-time, drive productivity and improve control over costs and resources.

Two Way Radio Repairs

Our fully accredited two way radio service centre in Granville, New South Wales, is one of the largest repair and installation centres in Australia. Our experienced technicians manage in-house maintenance and warranty fixes for our customers.
